Gates360™

Gates360 is not linking software, it does not create links through coding or create any automated HTML.

It is not a system of link exchange, nor does it contravene any search engine law or online marketing ethic. This is incredibly important, as the long term success of any online marketing investment needs to be hedge in credibility and non manipulation of the search engines.

Many offers of 'free Google ranking or your money back' is basically using software to abuse search engines.

By definition software creates patterns and tracks that will be discovered by Google for example, resulting in websites being banned.
